

MIGRATION MAGIC

The great migration of wildebeest and zebra, between the Masai Mara and Serengeti, is one of the most spectacular natural events on earth! The rich golden grass plains of the Masai Mara await this annual migration.

July, August, September and October are the perfect months to witness these big river crossings.

The “endless plains” of the Serengeti and the Masai Mara are filled with wildebeest and zebra as far as the eye can see! The “big cats” of lion, cheetah and leopard are particularly active at this time and one can be lucky to witness a live kill in action!

The private conservancies of Olare Orok, Mara North, Naboisho and Singita Grumeti are the perfect springboard to see the migration.

Off road driving close up to big game...night drives...high concentration of big cats...and extraordinary game viewing! With very few camps in these private conservancies, your safari is private and exclusive.

Safari Africa invites you to experience Migration Magic!
